

KAMIQ - K6

High directivity line source speaker & active subwoofer

FEATURES

- **Arrayable line source speaker**
- **Increased intelligibility due to unique wave guide design**
- **DSP enabled dual 15" active long throw subwoofers provides deep bass**
- **Various mounting options with pole, wall and flying hardware**
- **Can be used for portable or fixed installation applications**
- **Plug-and-play operation**

The KAMIQ-K6 from the Alpha Acoustics® family is a unique arrayable column speaker which is powered by an active DSP enabled subwoofer. This combo provides high SPLs for traveling bands as well as high intelligibility for mid-sized auditoriums and houses of worship.

The KAMIQ- K6SAT contains 4pcs of 6.5" drivers and 2pcs of 34mm horn loaded HF drivers. The unique design of the horn, enables stacking one column array on top of the other which delivers uniform coverage of upto 30m. Due to the controlled vertical dispersion, the K6SAT ensures great intelligibility in highly reverberant facilities. The unobtrusive design of the satellite speaker also ensures minimal interference with the aesthetics of the facility.

Along with the KAMIQ-K6SUB, which is a dual 15" subwoofer that has a built in DSP and amplifier, the KAMIQ system is able to pack up a punch above the rest.
